## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 85 and 94 are rejected under 35 U.S.C. 102(a) as being anticipated by the admitted prior art. Applicant admits in the paragraph bridging pages 6 and 7 of his specification that the application of a liquid between a substrate and template with the application of an electric field is part of the prior art. It is the examiner's opinion that applicant's method is encompassed by the admitted prior art.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 86 to 93 and 95 to 108 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior for the same reasons as urged above. It is the examiner's opinion that the limitations of these dependent claims are conventional and do not render these claims unobvious.
